The model above includes the existing salary schedule (steps 1-26) plus longevity step calculations, based upon the additional \$1,500 longevity step increase in effect since the 2019-2020 school year. The longevity step calculations apply to those certified staff members who are beyond step 26, prior to entering the “retirement pipeline.” The calculations exclude the additional \$500 one-time longevity payments effective with the 2022-2023 school year, as, for calculation purposes, these payments must be added independently. This document is for informational purposes only.

The model above includes the existing salary schedule (steps 1-26) plus longevity step calculations, based upon the additional \$1,500 longevity step increase in effect since the 2019-2020 school year. The longevity step calculations apply to those certified staff members who are beyond step 26, prior to entering the “retirement pipeline.” The calculations exclude the additional \$500 one-time longevity payments effective with the 2022-2023 school year, as for calculation purposes, these payments must be added independently. This document is for informational purposes only.
